

ARMOUR FLOOR TAPE DISPENSER

RE-USABLE

The Armour Floor Tape Dispenser is designed to drastically speed up the installation of tape to the seams of your temporary floor protection, whilst increasing the effectiveness of the seam due to the pressure applied from the roller. This tool makes the job a lot quicker, easier, and more efficient, and it decreases the likelihood of back injury from bending over to apply the seam tape manually. It is universal and works with any size of tape roll up to 4.5in wide with a standard core size.
