

ARMOUR GRIP-TERRA MAT

LAYS OUT FLAT
AND FAST

RE-USABLE

SLIP RESISTANT

Armour Grip-Terra Mats consist of a 1/2in thick heavy duty permeable rubber material which allows water and dirt to pass through, whilst providing excellent grip in all conditions. They are great for rough ground such as mud, gravel, ice, and snow, and can quickly be laid out to provide a pathway for your site. The bright orange colour stands out making it clear to see the pathway and helping with awareness and safety on site. Due to the durable material, they are easy to clean and highly reusable, making them a great temporary solution for any pathway over rough terrain.
