ARMOUR SPILL
PROTECTION

Armour Protection Board – Translucent is a 4mm thick fluted plastic sheet product which is versatile, easy to use and install, and can be used in many different applications as a temporary surface protection solution. Commonly used to protect glazing and windows, floors, cabinets, walls, countertops, showers, doors, and more. Since it is translucent, it allows light to shine through for projects where natural light is important such as window protection or temporary hoarding. It is lightweight, waterproof, flexible, impact resistant, easy to cut, and it lays flat, making it a first choice for many construction professionals.
