ARMOUR SPILL  
PROTECTION

GREAT FOR STAIRS

RE-USABLE

SLIP RESISTANT

Armour Stair Tread Protectors are an extremely durable protection solution for quickly and effectively protecting stairs from getting damaged. They are made from 4mm thick high density fluted plastic with a pre-formed 3in lip designed to cover and protect the nosing, complete with a grip tape strip on each tread for ultimate grip and anti-slip safety. They are lightweight, waterproof, easy to cut to size for smaller stairs, offering heavy duty impact resistance, and laying flat every time. Due to the durability, they are often reused on multiple projects.

Commonly used in conjunction with Armour Tape.
